Issue #6 **November 2009**

Behind every Jewelry Manufacturer there is a Strong, Consistent, and Faithful Diamond Supplier

It is known that in the Diamond industry, jewelry manufacturers must offer to their customers products at the right value, and in a consistent manner.
A Jewelry manufacturers **diamond supplier** must also provide this same value and consistency to the manufacturer. However, to mine it, cut it, polish it, sort it and to make it available is not an easy task!
Therefore, we must realize that the success of the jewelry manufacturer has a lot to do with the strength, support, consistency and honesty of his **diamond supplier**. Also, if a jewelry manufacturer has the full support of a strong **diamond supplier**, he won't have to wander around to find the right diamond. He will instead be able to focus his time and energy into other important parts of his business like design, marketing, and sales.

We all know that the most important raw material in jewelry manufacturing is the loose diamond. If the jewelry manufacturer has the peace of mind that he is getting the right diamond at the right price, at the right assortment, and in a consistent manner, this itself will give him the peace of mind that he will have a greater chance of success in his business.

We at International Diamond Club commit ourselves to our clients to be there for them for all their business needs. We offer our experience, expertise, and knowledge to support them in their business every step of the way. We invite all serious jewelry manufacturers to come and see what International Diamond Club has to offer. We strongly feel that once a manufacturer has done business with us, they will have the TRUE peace of mind they were looking for!

Wishing you all great success!

-Ely and Mike.
